

Level 1 Generic and Level 2 Medication List

7/24/20

The medications listed in blue are available at the Level 1 copayment (the lowest cost sharing amount) and the medications listed in black are available at the Level 2 copayment. Not all generic medications are listed in this Guide.

Some medications are available at a retail copay level but will still require specialty distribution limited to a maximum of a 30 day supply. BCBSAZ has selected Optum Specialty Pharmacy as the exclusive Specialty Pharmacy. The medications followed by “SP” may be obtained through Optum Specialty Pharmacy. Please contact Optum Specialty Pharmacy directly at (866) 618-6741 to establish service with them. If you are currently obtaining a Specialty Medication from a Specialty Pharmacy and need to receive that medication from a retail pharmacy instead, please contact the Pharmacy Benefit Customer Service number listed on your BCBSAZ member identification card. BCBSAZ and/or the PBM will decide whether you are eligible to receive the Specialty Medication from a retail pharmacy instead of a Specialty Pharmacy.

The Level 2 Medication List includes the specific medications available at the Level 2 copayment. For example, if Adderall XR is listed, but Adderall is not, Adderall may only be available at Level 3 or Level 4.

The medications followed by “PL” have Prescription Limitations as stated in your benefit plan booklet. To learn more about Prescription Limitations, please [click here](#).
